

SEMI Global Update

July 13, 2021

Market Research

Semiconductor Equipment Forecast to Post Industry High of \$100 Billion in 2022, SEMI Reports

The foundry and logic segments, accounting for more than a half of total wafer fab equipment sales, will grow 39% year-over-year to reach \$45.7 billion in 2021 ...

Critical Subsystems

Semiconductor Equipment Power Subsystems Deliver Extraordinary Revenue Growth

Process power and reactive gas subsystems account for approximately 13% of all expenditures on critical subsystems used in semiconductor manufacturing ...

Industry 4.0

HP Singapore Smart Manufacturing Strategies to Optimize Production Flexibility and Efficiency

We started our Industry 4.0 journey in 2016 with Vision and Mission 2020 to modernize our production facilities to smart factories that strengthen our ...

Standards

Energy-Saving Equipment Communication Webinar in Korea

SEMI E175 defines how process tools communicate with sub-fab equipment, such as vacuum pumps and gas abatement systems, can reduce utility consumption ...

SEMI-Related

Charge Your Car – No Wires Needed

Oak Ridge National Laboratory researchers demonstrated their wireless charging technology on an autonomous electric vehicle for the first time in a project ...
